-

Projects

Personal Website

Fall 2017

- Created my website using HTML5 and CSS3 for all the front-end visuals, jQuery for the back-end, and making sure it can be viewed on both large and small screen like mobile phones.
- The site provides information about myself, my resume, and other projects. All the code is available on GitHub and deployed as a live site at <http://tylertomasello.me>.

LaundryLift

Fall 2018

- The goal of this project was to create a business and to create a web application for this business.
 - The challenge was to do the job of each process in the development of the application.
 - The jobs were user research, UX/UI design, front-end development, back-end development, and user testing.
 - Tools used: Moqups, HTML5/CSS3, VueJS, Python, MongoDB
 - Description and code for project: <https://github.com/TylerTomasello/itmd567>.
-
